Do you need a roof inspection?

When to Consider Roof Replacement?

Roof replacement is something to consider when your roof shows visible signs of significant damage or age. Key indicators include frequent leaks, sagging areas, or missing and cracked shingles. If your roof is more than 20 years old and you notice substantial wear, such as granule loss from shingles or moss and algae growth, it might be nearing the end of its lifespan.

Call the roofing professionals at Roof Myrtle Beach for more details at 843-455-9044.

"From the initial consultation to the final installation, everything was handled professionally. I highly recommend Roof Myrtle Beach for any roofing needs!"
